

ARTIFICIAL TURF/VERTICAL GARDEN/GREEN WALL SOLUTIONS

ARTIFICIAL TURF

Artificial turf is a surface of synthetic fibers made to look like natural grass, used in sports arenas, residential lawns and commercial applications that formerly used grass. It is durable and easily maintained without irrigation or trimming. Artificial grass offers many benefits to the customers. It saves both money and time and is an excellent landscaping option.

ARTIFICIAL VERTICAL GARDEN/GREEN WALL SOLUTION

Artificial vertical gardens are an alternative creative way to get the green look without maintenance fuss. The artificial vertical garden is made up of synthetic plants standing with the help of interlocking panel. High quality artificial garden is lifelike with low maintenance cost and long lasting. Compared with using real plants, artificial vertical gardens have several advantages.

They can be used for residential and commercial projects such as backyards, balconies, shop decoration, offices and reception areas. Artificial vertical gardens are well-liked because they provide visitors with a welcoming atmosphere. In addition, they are incredibly appealing and lifelike to the eye, instantly inspiring emotions of tranquillity.
